location: HCG Hospital Tower-5; Board Room

Highlights of the program

Unique features of the Course:

- The Research and clinical training for fellows is supported by a comprehensive didactic program. Fellows organize and conduct the weekly Gynecologic Oncology Tumor Board and monthly Journal Club, present monthly progress reports on research activities. Fellows are encouraged and supported to attend and present at multiple national and international scientific meetings.
- Cadaver labs are part of the routine educational program. The goal is to train fellows to become academic gynecologic oncologists who are highly skilled, knowledgeable surgeons capable of establishing new academic gynecologic oncology programs at other teaching institutions

What are the course Objectives ?

- To create a work force of specialists trained in the field of Gynaecological Oncology.
- To improve practice, knowledge and research in the field of Gynaecological Oncology.
- To improve standards of care for patients suffering from gynaecological cancers.
- To encourage close understanding with disciplines such as Radiation Oncology and Medical Oncology involved in the care of women suffering from gynaecological cancer.
- To encourage co-ordinated management of gynaecological cancers as a multidisciplinary approach.
- The trainee should be able to design research protocol, implement the same and interpret the results of the research study
- The trainee should be able to evaluate the relevant literature critically
- A candidate would be expected to publish/submit two original articles related to the speciality in an indexed journal.
